講義の目的とねらい	Course purpose
Inorganic chemistry III is the final part of a three-semester course in inorganic chemistry consisting of parts I, II, and III. Aim of the three-semester course is to present principles and fundamentals of inorganic chemistry, to introduce chemical reactions and to show examples of the role of inorganic chemistry in the industry, environment and every day lives.	
履修要件	Prerequisite
Fundamentals of Chemistry I and II, Analytical Chemistry, Inorganic Chemistry I, Inorganic Chemistry II	
履修取り下げの方法について	How to Apply for Course Withdrawal
<p><「履修取り下げ届」提出の要・不要 Necessity/Unnecessity to submit "Course Withdrawal Request Form"> Necessary <条件等 Conditions> Course withdrawal needs to be submitted by either email or in paper form and will be allowed only until class 7, after the first exam (intermediate exam), which will take place after lecture 6. Exceptions for later withdrawal can only be granted in cases of illness, injury or other unavoidable reasons.</p>	
成績評価	Grading
<p>Activity (graded quizzes): 10% Intermediate and final exam: 90% (40% intermediate, 50% final exam, comprehensive) TOTAL 100% = 100 pts Grades: Grade evaluation will be based on your academic year of enrollment, students who enrolled in AY2020 and after that will be evaluated according to the A(+)-A-B-C-C(-)-F system. Grades are final and calculated on the basis of the performances during class (quizzes) and in the two exams only. There will be no possibility to improve a grade after the final exam. Students who miss the final exam due to a (documented) illness, injury or other unavoidable reasons can ask the instructor.</p>	
不可 (F) と欠席 (W) の基準	Criteria for "Absent(W)" & "Fail" grades

The course will be graded "F" (failed) if less than 60% of the points were obtained. The course will be graded as "absent" as stated in "course withdrawal".

到達目標 Goal

At the end of the complete course (Inorganic Chemistry I, II, III), students should have learned a robust foundation in physical inorganic principles and also applications of the subject to catalysis and industrial processes.

授業内容 Content

The contents of inorganic chemistry III will cover the topics of the chemistry of the d-block elements (traditionally called "transition elements) as well as two lectures about catalysis.

Additional to lecture time, students are expected to spend 1 - 2 hours per week for homework and preparing for lectures and quizzes.
