| 授業の目的 【英語】 Goals of the Course | The contract of sale is the backbone of international trade in all countries, irrespective of their legal tradition or level of economic development. The United Nations Convention on Contracts for the International Sale of Goods (in short, CISG) is therefore considered one of the core international trade law conventions whose universal adoption is desirable. The adoption of the CISG provides modern, uniform legislation for the international sale of goods that would apply whenever contracts for the sale of goods are concluded between parties with a place of business in Contracting States. By doing so, it aims at avoiding the recourse to rules of private international law to determine the law applicable to the contract, adding significantly to the certainty and predictability of international sales contracts. The course will present in detail the key features of the CISG, also by employing cases taken from real life legal practice. |
